

Education

Administration TRAINING

Duration:

1 day

Location:

BOARD UK
Tower 42
Floor 20
25 Old Broad Street
London
EC2N 1HQ

Requirements:

- 64 Bit laptop with a minimum of Windows 2007 Operating System.
- Microsoft Excel & Access

This course is designed for System Administrators who would like to be self-sufficient in installing, configuring and maintaining the BOARD Server & Client environment.

Delegates will learn about server architecture and how to install and configure the varying components of the BOARD software such as server, client, office add-in and web client. Hardware sizing and software parameter configuration for best performance is discussed as well as the different layers of Security maintenance (User Authentication methods and Authorization profiles). We also cover licensing, backup/saving policies, troubleshooting & error logging, and give an overview of some additional technical tools available for administrator and developer users.

Some of the methods and learnings will be put into practice during the course on a virtual server environment.

Education

Administration TRAINING

DAY 1

BOARD Architecture

1. Overall picture
2. Architecture Example
